# Credit Card Financial & Customer Analytics Dashboard
# Business Requirements Document (BRD)

## Business Problem Statement

The organization requires a reporting solution to understand revenue performance, customer spending behavior, card portfolio performance, transaction trends, geographic contribution, and delinquency risk across its credit card business.

## Business Objectives

• Monitor revenue, interest income and annual fee performance.
• Identify high-value customer segments.
• Analyze card category performance.
• Understand transaction behavior and spending trends.
• Evaluate geographic performance.
• Monitor delinquency and portfolio risk.

## Data Sources

Customer Dataset: customer demographics, occupation, education, income group, card category and location.
Transaction Dataset: transaction amount, transaction type, fees, interest, dates and delinquency indicators.

## Client Business Questions

1. What is total revenue generated by the portfolio?
2. How much revenue comes from interest and annual fees?
3. Which quarters perform best and worst?
4. Which customer age groups generate the most revenue?
5. How does revenue vary by gender, education and occupation?
6. Which income groups are most profitable?
7. Which card category generates the highest revenue?
8. Which card category has the highest transaction volume?
9. Which states contribute most revenue?
10. Which states are underperforming?
11. Which transaction methods are most frequently used?
12. Which transaction methods drive the highest revenue?
13. What is the average transaction value by segment?
14. What is the delinquency rate across the portfolio?
15. Which customer segments have the highest delinquency risk?
16. Which states have the highest delinquency exposure?
17. Which card categories have elevated risk?
18. What opportunities exist for customer acquisition?
19. Which customer segments require retention strategies?
20. Which segments should be targeted for cross-sell or card upgrades?

## Dashboard Requirements

Executive Summary Page: Revenue, Interest Earned, Annual Fees, Customer Count, Delinquency Rate.
Customer Analytics Page: Revenue by Age, Gender, Income, Education and Occupation.
Transaction Analytics Page: Revenue by Transaction Type and Time Trends.
Geographic Analytics Page: State-wise Revenue and Risk Analysis.
Card Analytics Page: Revenue, Interest and Fees by Card Category.

## Expected Deliverables

Interactive Power BI Dashboard, KPI Reporting Framework, Customer Analytics Reports, Transaction Analytics Reports, Geographic Analysis and Risk Monitoring Reports.
